

building a global oncology company

In 2000 Novocure developed its innovative therapy Tumor Treating Fields (TTFields).
Even after 20 years of innovation, it is only the beginning.

Novocure has a growing commercial business

FDA APPROVED
INDICATIONS

Yoram Palti, our founder and professor emeritus of physiology and biophysics at the Technion - Israel institute of technology, sought to leverage his expertise in biophysics to develop a new way to treat solid tumor cancers that would destroy tumor cells while sparing healthy tissue and avoiding many of the life-altering side effects of existing cancer therapies.

Founder

Novocure corporate timeline

Since our founding, we have reached many key milestones.

2000

Professor Yoram Palti, M.D. Ph.D., founds Novocure

2006

Phase 3 pivotal EF-11 trial opens

2009

Phase 3 pivotal EF-14 trial opens

2011

U.S. FDA approves TTFields for recurrent glioblastoma

2015

U.S. FDA approves TTFields for newly diagnosed glioblastoma add in combination with chemotherapy

2016

U.S. FDA approves second generation TTFields System for GBM

2019

U.S. FDA approves TTFields for MPM under HDE in combination with chemotherapy

striving to extend survival in some of the most aggressive forms of cancer worldwide

TTFields therapy is a foundational platform, enabling our efforts to make a difference in cancer. We are focused on growing our organization to bring TTFields therapy to as many patients who can benefit. Beyond our ongoing preclinical, clinical, and commercial efforts, we believe there is a considerable opportunity to improve the usability of TTFields through product innovation. We believe we are just beginning our journey.

“The ability to make it smaller and lighter is such a benefit to make the treatment more accessible, the second generation system is a symbol of what we can do and a precursor of things to come.”

– **Mike Ambrogi**,
Chief Operating Officer
